Experience

Smart4Sistemas, Salvador — Junior Full Stack Developer

FEBRUARY 2023 - Present

During my two years at Smart4Sistemas, I participated in the development of five distinct systems, leading the creation and implementation process of two of them. I worked with various languages and frameworks to build robust and scalable applications.

I highlight some of the skills and technologies I applied during this period:

- Utilization of Angular and Spring Boot for the development of cross-platform systems.
- Use of ZK for web system development.
- Optimization for high user capacity.
- Implementation of features, customization, and internationalization.
- Utilization of GitLab for code versioning.
- **Skills**: Angular; Java; ZK; Spring Boot; TypeScript.

Freelancer — Full Stack Developer

JUNE 2024 - Present

I developed two personal projects:

Camaleão dos Sabores: An app for order management and restaurant administration.

 Gestão Animal: A solution aimed at simplifying farm management and its activities.

 Both were created with a focus on user experience and application performance.

I highlight some of the skills and technologies I applied during this period:

- Use of React Native, Next.js, and Node.js for application development.
- Optimization for high user capacity.
- Implementation of hyper-personalization and internationalization features.
- Use of GitHub for versioning and Insomnia for API testing.
- **Skills**: React Native; Next.js; Node.js; TypeScript; Prisma.

Languages

- English - Intermediate
- Portuguese (BR) - Native

Education

Jorge Amado University Center, Salvador — Bachelor's Degree in Computer Science
JULY 2020 - DECEMBER 2024

Complementary Courses

- Web Development - JavaScript.
- Database - MySQL.
- JavaScript - Advanced ES6+.
- Networking - Cisco & HRBCursos.
